

# Guidelines for Human Rights Protocol and Architecture Considerations

## **draft-irtf-hrpc-guidelines**

Gurshabad Grover and Niels ten Oever  
HRPC @ IETF110

# Objective

- Create a document for human rights guidelines (based on RFC8280)
- Practice based and practice-oriented

# Changes in this version

- No easy way to summarise changes. Ref: reviews by Joey, Corinne, Farzaneh and Bill (thanks so much!)

# Forthcoming changes

- Tone review
  - Speak directly to protocol developers
  - Be more solution-oriented // guide rather criticise
- Address Sandra Braman's review
- Misc. fixes

# Open question

- Is the text on attribution/legal remedy fine?

# How you can help

- Help with this research: review drafts using the guidelines, and email the hrpc list with what you think
- If you're writing a Human Rights Considerations section, tell us if you think the guidelines were useful
- Move to last call/publication after this set is done
