Key changes from -04 to -05

• Editorial updates: Align nomenclature used within the document with [I-D.ietf-ippm-ioam-data]

• Note about the max length of IPv6 options (255 octets) which naturally limits the length of IOAM Option-Types.

• Addition of Direct Export Option:

5. Direct Export (DEX) Option: The in-situ OAM Direct Export Option-Type defined in [I-D.ietf-ippm-ioam-direct-export] is represented as an IPv6 option in the Hop-by-Hop extension header:

   Option Type: 000xxxxx 8-bit identifier of the IOAM type of option. xxxxx=TBD.

   IOAM Option-Type: IOAM Direct Export (DEX) Option-Type.
Discussion & Next Steps

• Todo
  • Adopt “editor” model for list of authors
