

L4S Drafts: What Needs To Be Done

1. Transport-protocol-independent requirements to use L4S service
 - Goal: Interoperability – multiple transport protocols able to meet requirements
 - Specifications and/or implementations – WG decides what is sufficient
 - Location: draft-ietf-tsvwg-ecn-l4s-id

2. Safety of Internet-wide L4S experiment
 - Goal: L4S experiment unlikely to cause significant damage to the Internet, and
 - Any damage that results is expected to be tolerable
 - Location: draft-white-tsvwg-l4s-ops (candidate for WG adoption)
 - WG Last Call on l4s-ops draft not required to meet safety goal

- Criteria: WG “rough consensus” that each goal has been reached
 - WG chairs will run initial consensus calls before next IETF meeting week
