

IETF 111: jscalendar-icalendar

<https://datatracker.ietf.org/doc/html/draft-ietf-calext-jscalendar-icalendar-05>

JSCalendar from iCalendar

- All properties, parameters covered
- Revise after cross-check with implementations

JSCalendar to iCalendar

- Separate RFC for fractional seconds in iCalendar
- Use VPARTICIPANT, STRUCTURED-DATA for Participant, Link
 - Keeps backwards-compatible ATTENDEE and ATTACH
 - Need CalDAV extension to negotiate eventpub support?
- Preserve JSCalendar ids in iCalendar with new ID property?
- Need VLOCALIZATION to preserve localizations?
