# Manage and prioritise workload

- Inventory of WG documents
  - Close to/ready for WGLC
  - Low hanging fruit
  - What does the WG think about priorities? Poll!

# Results from poll active WG documents

DNSOP Documents

Results from WG poll. 36 responses on 29 July 2021.

# Close to/ready for WGLC

- dnssec-iana-cons
  - not much discussion on mailing list yet, but maybe with WGLC
- glue-is-not-optional
  - lively discussion on mailing list
- avoid-fragmentation
  - set of advised DNS payload sizes under discussion

# Low hanging fruit

- nsec3-guidance
  - measurements of nsec3 iterations ongoing
  - settle on max iteration count: 50, 100, ...
- -

# Priorities from the poll

- Some already close to WG or long hanging fruit
- dns-error-reporting
  - adopted after IETF 110
  - more discussion needed and (prototype) implementations
- ns-revalidation
  - adopted after IETF 108
  - need review of -01 by WG

## Priorities from the poll (2)

- Other drafts with interest from WG
  - catalog-zones
  - rfc8499-bis
  - private-use-tld
- New work suggested
  - draft-thomassen-dnsop-dnssec-bootstrapping
  - dnssec-automation
  - error-page and structured-dns-error-page

# How to proceed with ...

- Held by WG
  - alt-tld: recent renewed interest
- New work suggested
  - held back by authors until queue is cleared
  - from poll
  - proposed during WG meetings, etc.

Let's discuss!
