

DOTS Signal Channel Call Home

[draft-ietf-dots-signal-call-home-14](#)

IETF#111, July 2021

Mohamed Boucadair

Tiru Reddy

Jon Shallow

Status Update

- December 2020: **IESG Review** based on -12
 - Good comments + 2 DISCUSSEs with one related to the port assignment
 - Tentative to explain that the call home is a distinct service than the base DOTS signal channel
- January 2021: **Release -13** to address the IESG review
 - One DISCUSS was cleared (Roman)
 - One DISCUSS moved to ABSTAIN
 - ...but the tracker says « *Needs 4 more YES or NO OBJECTION positions to pass* »
 - Poked our AD
- May 2021
 - Shared the proposal in the WG mailing list to withdraw the IANA port request with a recommendation to use distinct ports numbers when both services terminate on the same node
 - **Release -14** to reflect the change as no objection was raised on the list
 - Poked our AD

Next Step

- IETF#111
 - Ben, can you please share with us your plans for the draft?
 - Would it be possible to schedule the draft in next IESG Telechat?
 - We hope the RFC can be published before the end of year
 - Thank you
