# Versions since IETF 110

- -06
- Updated "Privacy Considerations" and "Security Considerations" sections
- Added Appendix A: "Paradigms to Enforce Access Control on Reverse Search in RDAP"

# Evolution of regulatory context - eEvidence

- On December 2020, the Committee on Civil Liberties, Justice and Home Affairs (LIBE) of the EU Parliament published its report on the proposal for a regulation on European Production and Preservation Orders for electronic evidence in criminal matters (e-Evidence).
- The report also instructs the EU Commission to establish “**a common European exchange system with secure channels for the handling of authorized cross-border communication, authentication and transmission**” of the data access orders and the requested data between the competent authorities and service providers.
- The deadline to comply with foreign data access orders **SHOULD be, in emergency cases, 16 hours.**
- The report was approved by the EU Parliament, and then trilogue negotiations with the EU Council and the EU Commission started on the final text of the legislation.
- Reverse search (Reverse WHOIS) is used to support cyber investigations

# Thanks for the attention!

## Q & A
