# What's new in -13?

- New Contributor (Jordan Head)
- AD Comments
- Reader's Digest
- SVG
- Restructuring

It's a new protocol, the draft is going to be big.

- Streamlined “flow” for the introduction sections.
- New “Reader’s Digest” section to help the reader determine what they find relevant.
- Added various forward references to sections and schema elements.

# Syntax, not inconsistency tax.

- Made terminology consistent.
  - For example, clearer FSM diagrams/definitions.
  
- Made language uniform.
  - No more shifting between the 1<sup>st</sup> and 3<sup>rd</sup> person.

# We broke the ID-Submission tool!

- Most images now have SVG equivalents.
- Improves readability.
  - Multiplane topologies.
  - Negative Disaggregation.
  - FSMs.
- Text versions of draft fall back to ASCII per-design.

# The Thrift models are normative.

- Discussions yielded the question – “What are we standardizing?”
- Other text is supporting detail.
- Stable Thrift reference in the works.
