

# IPv6 Lab Prefix Draft

(and Reserving Additional IPv6 Address Prefixes for Use in Documentation – different Draft but covering here too)

# Lab Prefix

- <https://datatracker.ietf.org/doc/draft-horley-v6ops-lab/>
- Integrated feedback from email list, for example:
  - Operational considerations explained,
  - Address RFC 6724 precedence values,
  - Expanded operational section.
- Provided a goals section in the introduction, also added criteria,
- New draft will be ready to post shortly, incremented to -01.

# Additional Documentation Prefix

- <https://datatracker.ietf.org/doc/draft-horley-v6ops-expand-doc/>
- Integrated feedback from email list, for example:
  - Ability to depict unique IPv6 prefix identification (simple visual representation to identify separate networks),
  - More prefix options (added an additional prefix),
  - Ability to document network architectures (including addressing plans) larger than a /32,
  - Have limited impact on IANA and no impact on any RIRs.
- New draft will be ready to post shortly, incremented to -01.
