

URI Signing

Livin' on a prayer

- Was in Last Call in February
- New revision before October dead period
- Had lots of feedback from IESG
 - Client IP**** (usefulness and privacy)
 - Shared keys (security)
 - Why are some things SHOULD and not MUST? When can implementers ignore SHOULD?
 - Advice to designated experts
- Should we...
 - Remove Client IP?
 - Remove Shared Keys?
 - Make cdniuc (URI Container) mandatory?
