

# Media Over QUIC side meetings at IETF 112

- IETF 111 “Video Ingest” side meeting morphed to “Media over QUIC”
  - [MOQ mailing list](#) created, and was very quiet until October 26 ([archives](#))
- Lots of people with different needs for legitimate reasons
  - But we need to understand those needs to do anything at the IETF
- Planning two side meetings on “Media Over QUIC” at IETF 112
  - “Understand what’s needed” from the IETF on Tuesday at 18:15 UTC
  - “Planning for next steps” (if needed) on Friday at 18:15 UTC
- These are working meetings, but they are public ([in meeting wiki](#))
  - If you can contribute, please come
  - I expect to publish minutes on the MOQ mailing list afterwards
