Feminism and protocols

# Abstract

This document aims to describe how internet standards, protocols and their implementations may impact diverse groups and communities. The research on how some protocols can be enablers for specific human rights while possibly restricting others has been documented in {{RFC8280}}. Similar to how RFC 8280 has taken a human rights lens through which to view engineering and design choices by internet standardisation, this document addresses the opportunities and vulnerabilities embedded within internet protocols for specific, traditionally marginalized groups.

# History

1. Presentation of the Feminist Principles of the Internet -- IETF 104
2. Version 00
  - a. Identify how user-level threats can be related to internet protocols
  - b. Identify how gender is embedded in the design of protocols in the IETF.
3. Version 01
  - a. If RFC 8280 looks at the UDHR, draft-feminism looks at the FPIs
  - b. Focus on process.
4. Version 02
  - a. New introduction
  - b. Broaden to literature review beyond FPIs
  - c. Shift to one goal of identifying user-level impacts of internet protocols as guidelines for design.

# The Feminist Principles of the Internet

provide a framework  
for women's movements  
to articulate and explore issues  
related to technology.

# History

1. Presentation of the Feminist Principles of the Internet -- IETF 104
2. Version 00
  - a. Identify how user-level threats can be related to internet protocols
  - b. Identify how gender is embedded in the design of protocols in the IETF.
3. Version 01
  - a. If RFC 8280 looks at the UDHR, draft-feminism looks at the FPIs
  - b. Focus on process.
4. Version 02
  - a. New introduction
  - b. Broaden to literature review beyond FPIs
  - c. Shift to one goal of identifying user-level impacts of internet protocols as guidelines for design.

In the first version we were trying to cover two different problems:

### In the user level

Describe some internet threats considering gender and other social locations where people can experience both oppression and privilege

Identify how those threats can be related to internet protocols

### Inside the IETF

Identify some manifestations of gender discrimination in IETF archive, by analyzing terminology and contexts of RFCs and I-Ds.

Point out how mentality (in this case, about gender roles) is embedded in protocols designing

# History

1. Presentation of the Feminist Principles of the Internet -- IETF 104
2. Version 00
  - a. Identify how user-level threats can be related to internet protocols
  - b. Identify how gender is embedded in the design of protocols in the IETF.
3. Version 01
  - a. If RFC 8280 looks at the UDHR, draft-feminism looks at the FPIs
  - b. Focus on process.
4. Version 02
  - a. New introduction
  - b. Broaden to literature review beyond FPIs
  - c. Shift to one goal of identifying user-level impacts of internet protocols as guidelines for design.

In version 01 we chose to address the first problem, as follows:

**RFC 8280** focuses on how some protocols can enable or restrict specific human rights, assuming that those fundamental rights are held by all people equally.

Based on the **Feminist Principles of the Internet**, this draft recognizes how different social locations may determine people's capacities to exercise their rights through the internet.

# Next steps

1. Reformat draft to reflect current structure
2. Develop research question: How can intersectional feminism guide the development of internet standards, protocols and their implementations?
3. Perform desk research in service of the research question.
  - a. Focus on storytelling
  - b. Create a repository of media and textual projects
  - c. Invited talks, workshops, interim meetings.
4. Pause...

# Requests

- Interested researchers and authors should get in touch:  
[draft-guerra-feminism.all@ietf.org](mailto:draft-guerra-feminism.all@ietf.org)
- Should the working group adopt this draft?
