Nov 2021

Recap: BGP Update to advertise the App related Site-Cost metrics

Major Change: App related Site Cost carried by Tunnel-Encap

Load Measurement sub-TLV

```
0 1 2 3 4 5 6 7 8 9 0 1 2 3 4 5 6 7 8 9 0 1  
+++++-----+-----+-----+-----+-----+-----+  
|       Type (TBD2)      |       Length      |  
-----+-----+-----+-----+-----+-----+-----+  
|           Measurement Period          |  
-----+-----+-----+-----+-----+-----+-----+  
|           Aggregated Load Index to reach the App Server |  
-----+-----+-----+-----+-----+-----+-----+
```

Figure 4: Aggregated Load Index Sub-TLV

Raw Load Measurement sub-TLV:

```
0 1 2 3 4 5 6 7 8 9 0 1 2 3 4 5 6 7 8 9 0 1  
+++++-----+-----+-----+-----+-----+-----+  
|       Type (TBD3)      |       Length      |  
-----+-----+-----+-----+-----+-----+-----+  
|           Measurement Period          |  
-----+-----+-----+-----+-----+-----+-----+  
|           total number of packets to the AppServer      |  
-----+-----+-----+-----+-----+-----+-----+  
|           total number of packets from the AppServer      |  
-----+-----+-----+-----+-----+-----+-----+  
|           total number of bytes to the AppServer      |  
-----+-----+-----+-----+-----+-----+-----+  
|           total number of bytes from the AppServer      |  
-----+-----+-----+-----+-----+-----+-----+
```

Figure 5: Raw Load Measurement Sub-TLV

The Capacity Index sub-TLV has the following format:

```
0 1 2 3 4 5 6 7 8 9 0 1 2 3 4 5 6 7 8 9 0 1  
+++++-----+-----+-----+-----+-----+-----+  
|       Type (TBD4)      |       Length      |  
-----+-----+-----+-----+-----+-----+-----+  
|           Capacity Index          |  
-----+-----+-----+-----+-----+-----+-----+
```

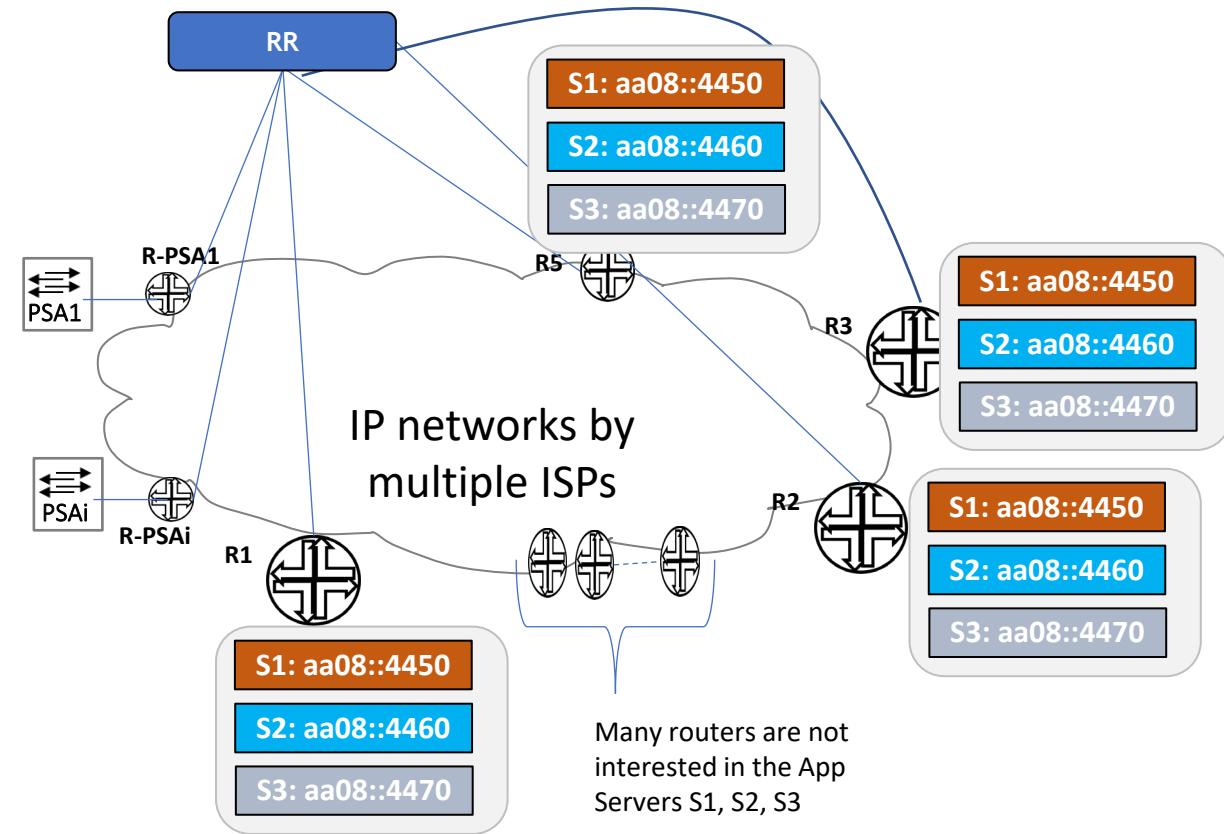

The Preference Index sub-TLV has the following format:

```
0 1 2 3 4 5 6 7 8 9 0 1 2 3 4 5 6 7 8 9 0 1  
+++++-----+-----+-----+-----+-----+-----+  
|       Type (TBD5)      |       Length      |  
-----+-----+-----+-----+-----+-----+-----+  
|           Preference Index          |  
-----+-----+-----+-----+-----+-----+-----+
```

AppMetaData Propagation Scope

- BGP RT constrained distribution (RFC4684)
 - there are much more App Servers than the number of routers
- Create a AppServer-Bound-Group
 - Based on the Edge Computing service ACL configured to each Ingress router

AppServer ID	Interested Routers	Time To Live	Other attributes
S1: aa08::4450	R-PSA1, R-PSA2		
S2: aa08::4460	R-PSA1		

Next Step

- Solicit more comments from the WG
- Ask for WG Adoption
