

LAMPS E-mail Header Protection

IETF 112 OpenPGP (Nov 2021)

Daniel Kahn Gillmor dkg@fifthhorseman.net

[draft-ietf-lamps-header-protection](#)

Stalled

Multiple options in the draft.

Unclear how to choose.

Set of criteria proposed, little to no feedback.

Do we need to ask different questions?

All proposals would work for new clients.

Sticking point seems to be handling by legacy clients.

Proposal for evaluation

Minimize any change in experience for legacy clients.

Ignore security increase for legacy clients.

Rationale

Incentivize moving to compliant clients

Break logjam
