Review of
draft-ietf-regext-rdap-jscontact

Mario Loffredo
Registro.IT/IIT-CNR
Gavin Brown
CentralNic

Versions since IETF 111

- **-03**

  - Compliance with draft-ietf-jmap-jscontact-08

Recommended JSContact map keys in RDAP

- RDAP providers are RECOMMENDED to use some RFC5733 labels as map keys :

  - "**org**" for either the only or the internationalized organization in the "organizations" map;

  - "**addr**" for either the only or the internationalized postal address in the "addresses" map;

  - "**email**" for the email address in the "emails" map;

  - "**voice**" for the voice number in the "phones" map;

  - "**fax**" for the fax number in the "phones" map.

- The localized versions of name, organization and postal address MUST be inserted into the "localizations" map.
Next steps

- JSContact spec is ready to be submitted to IESG

- Other implementations in addition to .it:

  - CentralNic (done, live soon)

  - Other registries have manifested their interests in this proposal and are implementing it (feedback from last interim meeting)
