

draft-moran-suit-update- management-00

IETF112 online

Brendan Moran

Summary

- Export of removed metadata from Manifest draft
- Contains update management metadata:
 - Conditions for managing updates
 - Version number match
 - Battery level
 - Use Before
 - Image not match
 - Check Authorization
 - Directives for managing updates
 - Wait for event
 - Metadata for non-recipient devices
 - CoSWID / CoRIM

Open Issues

- Currently specifies CoSWID
- CoMID would be more appropriate
- Not clear that this document is comprehensive or complete
- Need more feedback
 - Any interest in contributing to this?
