

# L4S WGLC Status

# WGGLC

- Three main drafts were in working group last call 7/29 – 8/27.
  - draft-ietf-tsvwg-l4s-arch
  - draft-ietf-tsvwg-aqm-dualq-coupled
  - draft-ietf-tsvwg-ecn-l4s-id
- Note: draft-ietf-tsvwg-l4sops was not a part of the WGGLC.
- Large number of diverse responses received.
  - Very strong overall support.
  - Several well-explained concerns.

# Next Steps

- Editors have been making updates and response to comments.
- Chairs agreed there is a bit more work needed regarding several of the questions and concerns raised:
  - Working group discussion on possible planning to obsolete 3168.
  - Review of changes made to clarify status with regard to RFC 4774.
  - Confirm working group consensus on acceptable risks.
- There are additional concerns that may need more work, but are of lesser criticality (e.g. aspects specific to DualQ).
