

Benchmarking Methodology for Network Security Device Performance

Bala Balarajah

Brian Monkman

BMWG Meeting at IETF 113 Vienna

Discuss Submissions

- 8 submissions
 - Have proposed resolutions for 5
- The submissions from Lars Eggert and Benjamin Kaduk are being discussed

Comments

- 69 comments
- 66 will be addressed
- 3 remain – continuing to consider options

SHOULDs

- Lively discussion on the BMWG mailing list
- Suggestion that anything not a MUST “should” include an explanation on why it is a SHOULD instead of a MUST
- At least 110 SHOULDs to consider
- This issue “should” have IETF wide implications
- Question – “should” this impede the progress of this draft?
