

Drone Remote Identification Protocol (DRIP)

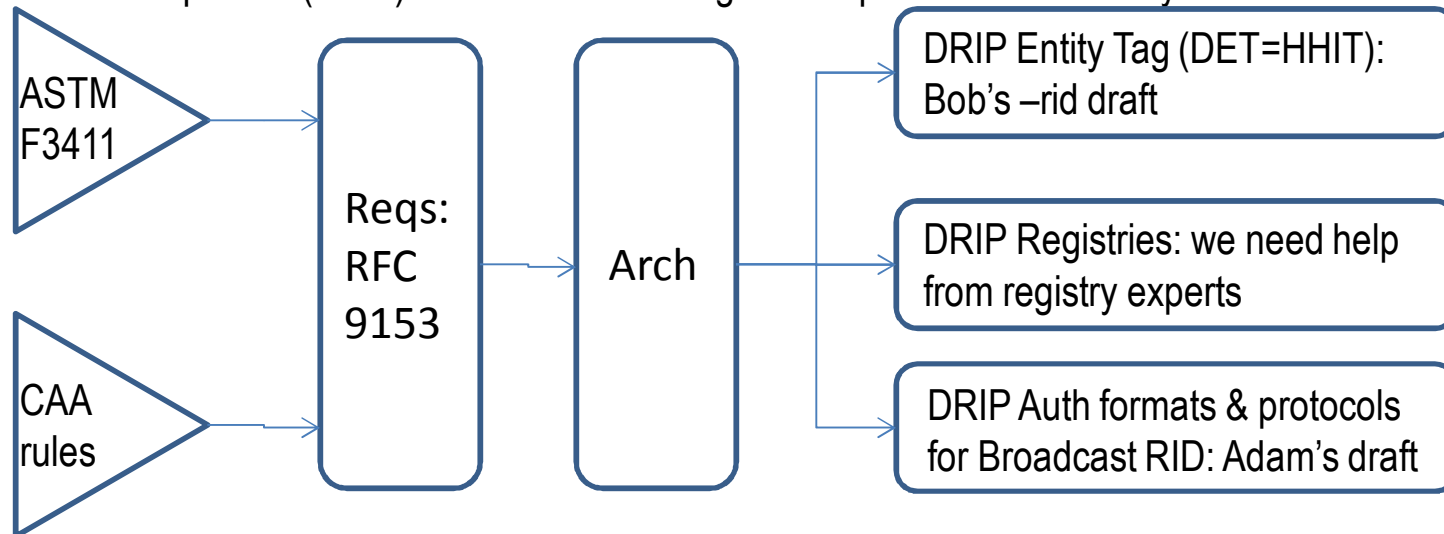

ASTM update, DRIP draft comments & related activities

MAR 23 stu.card@axenterprize.com 315-725-7002

“ RFC 9153 DRIP Requirements & Terminology published 2022 FEB! 😊

“ ASTM F38 balloted 2022 FEB – MAR on 2 UAS RID documents.

- . F3411-22 technical standard: one negative alleging IPR conflict of interest must be resolved.
- . Means Of Compliance (MOC) w/US FAA rule using F3411: passed unanimously.

“ DRIP Architecture draft approaching IETF last call?

- . Should introduce not only identifiers & registries but also authentication formats.
- . In some areas just lists possibilities (e.g. “A CS-RID Finder could”), needs to specify to enable interoperability!

“ Do we need a MOC doc showing how to use technical standards to satisfy CAA regulations?

“ Successful 2021 JUL field test to be repeated this summer, hoping to check prototype interoperability.
