

IETF 113 HotRFC

Brought to you by
Aaron Falk who did all the work, and
Spencer Dawkins who is in Vienna

The Ground Rules

- **HotRFC is a Request For Conversation**
 - It's a good way to find people to talk to, for various reasons
- Each person gets four minutes from “Go” to “Applause”
 - When we applaud, please hand the microphone over
- We don't do questions here - each person provides follow-up info
 - Let the conversations begin!

The Agenda

- [Easy Selection of QoS](#) Donald Eastlake
- [Computerate Specifying: Verified Internet-Drafts](#) Marc Petit-Huguenin
- [Data Center Congestion Management Initiatives in IEEE 802.1](#) Paul Congdon
- [RFC Adjustments for Multi-Signer DNSSEC](#) Ulrich Wisser
- [Virtualization of PLC in Industrial Networks](#) Kiran Makhijani
- [Wide Area Network Autoscaling for Cloud Applications](#) Berta Serracanta
- [Supply Chain Integrity, Transparency, and Trust](#) Henk Birkholz
- [Air Flight CO2 Emissions associated to in-person IETF meetings](#) Daniel Migault

Applause!!!

Found something new to say
when I leave a room.

*Thank you to
the presenters!*

*And please,
Make Good Choices*
