A YANG Data Model for In-Situ OAM

draft-ietf-ippm-ioam-yang-03

Huawei: Tianran Zhou, Jim Guichard

Cisco: Frank Brockners, Srihari Raghavan

Major Changes

- Addressed comments from Tom Petch and requirements off the list.
    - Add details (timestamp-type and available-interface) to "ioam info" for IOAM capability request.
    - Align with the [ietf-ippm-ioam-data] draft on PoT configuration. User need to augment this module for the configuration of a specific POT type.
    - Reduce all the proflix YANG identifiers.
    - Add more descriptions and make the draft more readable.
    - Update the security considerations.
    - Clean some nits.

Next

- IOAM data plane drafts are stable. This YANG model is already aligned.
- This draft is getting stable and mature.
- YANG doctor review.
- Working group last call.

Thank You
