

JMAP Blob – IETF113 Vienna
Bron Gondwana
<brong@fastmailteam.com>

Changes since -08

- Changed Blob/set to Blob/upload
 - No state
 - No update or destroy
- Removed catenate
 - More complex for simple case, but more regular
- Made capabilities simpler
 - No inheritance, explicit limit or none

Everything is catenate

- data: an array of DataSourceObjects
- Example:

```
[
  "Blob/upload",
  {
    "create": {
      "b4": {
        "data": [
          {
            "data:asText": "The quick brown fox jumped over the lazy dog."
          }
        ],
        "type": "text/plain"
      }
    }
  },
  "S4"
],
```

Done?

- We're in WGLC, but this is a significant change.
- Please send feedback on the list.
- Implemented in Cyrus IMAP already.
