

draft-ietf-suit-report-01

ietf 113

Brendan Moran

2022-03-24

Recap

- Carries a record of decisions made by the suit manifest processor
 - Can only be decoded alongside the manifest tree
- Decisions are appended to the log in order
- Indefinite length encoding can be used to ensure that the record is easy to encode on the fly

Changes since v00

- Add system property claims
 - List of Suit-parameters + component ID
- Enables attestation of system properties
 - Has wider applications than just attestation
 - Ties into SUI Reporting policy
