

draft-ietf-suit-update- management- 00

ietf 113
Brendan Moran
2022-03-24

Recap

- Contains update management metadata:
 - Conditions for managing updates
 - Version number match
 - Battery level
 - Use Before (expiry)
 - Image not match
 - Check Authorization (e.g. external authorization, end-user approval)
- Directives for managing updates:
 - Wait for event
- Metadata for non-recipients

Open Issues

- Currently specifies CoSWID
 - CoRIM looks like a better option
 - CoRIM is not a wg document yet
 - <https://datatracker.ietf.org/doc/draft-birkholz-rats-corim/02/>
- Not clear that this document is comprehensive or complete
- Need more feedback
 - Any interest in contributing to this?
