

Segment Identifiers in SRv6

draft-krishnan-6man-sids-01

IETF 114

Summary

- Draft adopted as working group item after IETF 113
- All the comments received on the mailing list regarding the content of the draft have been addressed in -01
 - Reworded potentially ambiguous wording in the request of the IANA considerations section to clarify that the requested address block comes from the “Reserved for IETF” space and not the Global Unicast space (Jen L., George M., Ted H.)
 - Clarifications regarding where the destination address can change (Darren D.)
- Need to close the loop with spring WG
 - Communicate that there are actions for spring WG in Sections 4.1 and 4.2 (Brian C.)
 - Check with spring that a /16 would be sufficient (Brian C.)

Next Steps

- Working group last call
- Communications towards spring wg
