Review of Changes
Wrap up IESG Review...

Changes Since -17

- Lots of text improvements

  - Thanks Med, Eric, IESG, IANA, and others!

- **NO** design/technical changes

- Ver -29 was the IESG review version

  - Ver -31 should be available now

    - Changes from -30 in IANA Considerations

Open Items

- The term "Registrar" is problematic within the IETF
  - We will be using a different label to indicate this is NOT a DNS/Domain Registrar
    - Perhaps "DRIP Registration Agency"
    - Better ideas welcomed!

Open Items

- Lots of cans kicked down the road to drip-auth and drip-registries
  - We need to decide if any changes in those, known to date need to be kicked back up
    - e.g. DNS tree structure
    - UA's DET HDA registration Attestation in DNS as alternative to DNSSEC
    - Drip-registries is moving to a EPP frontend

Open Items

- Or leave sleeping dogs alone…
  - Drip-registries IS still fluid.

Next Steps

- Talk to IESG this week on any remaining concerns
    - Update draft accordingly
