What changed between -10 and -11? A few things

- Synchronized the Abstract and Introduction sections
- Added lots of definitions and scoping text
- Added notes about video bitrates
- Improved explanation of "baseline" for monitoring
- Cut details about "unpredictable usage profiles"
- Added background about Adaptive Bitrate Streaming
- *Added "competing goals" text for personalized ad insertion*
- Rewrote Section 6, including addition of "Media Transport Protocols"
- Provided clarifications on "media encryption"
- **Made so, so, so many additions to the Acknowledgments section**

The editors' take on the path forward

- Ask the working group to object to any problematic changes (soon)
  - Please pay special attention to the changes in color on slide 3
- Address last two issues and submit -12
- Ask Roman if we have addressed his Discuss comments
- Ask Eric to approve -12 (ish) and forward to the RFC Editor
