mLDP Extensions for Multi-Topology Routing

draft-ietf-mpls-mldp-multi-topology-00
Background/History

• Draft was presented back in IETF 111
• Got adopted last month
• There is an implementation & deployment
• This draft in agenda to discuss some of the comment during adoption call
Comment during Adoption call – 1

• OLD TEXT:
  Reserved: This 8-bit field SHOULD be zero.

• NEW TEXT:
  Reserved: This 8-bit field MUST be zeroed on transmission and ignored on receipt.
Comment during Adoption call – 2

- separate the mLDP extension to support OSPF and ISIS MT RFC 4915 and RFC 5120 respectively from Flex Algo as it would make the solution to extend Flex Algo support simpler as it would not be on the base LDP multi topology extension RFC 7307.
