Charter Discussion

- Current charter only includes:
  - Base spec, Applicability Statement, YANG model
- We’re getting close to finishing the above three items
- We have adopted three items that are not exactly in the charter
  - KV registry is a spin-off/add-on of the base spec
  - SR, Auto-EVPN as new features
- Two more features that we’d like to work on
  - Multicast, Auto-Flood Reflection
- New charter would include the above five items
