

Sedate Liaison with ISO TC154

Mike Douglass Jul 21/2022

Liaison Approval

- Took quite a while
- Just realized approval was April 1st - an auspicious date...

Meetings Attended

- Attended 5? since approval
- Much 8601 work appears to be done?
- Some meetings concentrate on ISO 34000 - vocal and terms

24:00:00 issue

- This may be present in earlier versions
- End of a period is non-inclusive in all cases - except...
- 24:00:00 is stated to mean end-of-day
- Apparently due to a German legal requirement

Accessing documents

- ISO does not freely share standards
- Trying to get a working copy and determine how much that can be shared with sedate
