ACME DTN Node ID Validation

IETF 115 ACME WG

Brian Sipos
JHU/APL

Current Status of Draft

- Latest is https://www.ietf.org/archive/id/draft-ietf-acme-dtnnodeid-10.html

- Changes since -09:
  - Corrected typos
  - Added aside paragraphs to explain the experimental nature of each aspect of the validation method
  - COSE Hash Algorithms is now RFC 9054

- Known issues remaining:
  - The companion document to update the IANA sub-registry for Bundle Protocol is up for DTN WG adoption
