

Draft-ietf-dnsop-alt-tld-18 at
IETF 115

Is alt-tld ready for WGLC?

- Are there open issues that will benefit from further discussion?
 - The chairs and editors have discussed what seem to be contentious issues from the most recent list traffic
 - Current draft answers chairs' concerns as sent to the list on 16 October.
 - Are we ready to move from discussion to consensus call?
- If it seems we have open issues that could be closed by further scoped discussion, we will schedule an interim for that.
- If it seems we've said everything and views are unlikely to change further, we will move to a Working Group Last Call
- Thanks for your patience
