

New IETF community wiki

<https://wiki.ietf.org>

The screenshot shows the homepage of the IETF Community Wiki. The page has a dark header with the site name, a search bar, and a user profile icon. A blue sidebar on the left contains navigation links for Home, Key Subjects (Groups, Meetings), Popular Pages (IETF 115 Side Meetings), and Help (Contributing to this wiki, Sandbox, Moving from Trac). The main content area is titled 'Home' and features a 'Welcome to the IETF Community Wiki' section. This section includes a paragraph explaining the wiki's purpose, a note about the 'IETF Note Well' tag, a 'Scope' section with a list of out-of-scope content, and a final paragraph about the 'IETF Notes service'.

- Moving from Trac

Welcome to the IETF Community Wiki

This is a community wiki for IETF participants to use. It replaces the previous structure of trac wikis where each working group/team had its own trac instance.

The [IETF Note Well](#)  applies to all content on this wiki, and it is referenced on every page.

Scope

This wiki provides persistent working spaces for various IETF groups (such as Working Groups, Birds-of-a-Feather groups, Areas, Directorates, and Teams) and activities, such as IETF meetings.

This wiki should not be used for content that should be on any of the other dedicated IETF sites. For example the following are out of scope:

- ▶ Explanatory/general text about the IETF.
- ▶ Repository/listing/metadata for Internet-Drafts and/or RFCs
- ▶ Information for authors of I-Ds.
- ▶ Information about the AUTH48 process.

This wiki complements (but does not replace) the [IETF Notes service](#) , which is intended as a best-efforts service for ephemeral note and document creations.

The IETF is moving to a new wiki platform.

Over 100+ group wikis have not yet migrated.

The current plan anticipates only keeping the content at trac.ietf.org through 2022.

Contact ghwood@staff.ietf.org if you haven't yet migrated your group's wiki (or have questions)

Group chairs leadership training

Promoting Contribution:

Encouraging input from participants and ensuring all viewpoints are heard.

- [30 November 2022 at 1500 UTC](#) or [30 November 2022 at 2100 UTC](#)

Resolving Conflict:

Acknowledging differing views and managing differing perspectives when alignment seems unlikely.

- [7 December 2022 at 1500 UTC](#) or [7 December 2022 at 2100 UTC](#)

Building Consensus:

Arriving at solutions supported by the group, even when they are not in full agreement.

- [14 December 2022 at 1500 UTC](#) or [14 December 2022 at 2100 UTC](#)

On-demand videos and downloadable materials for each class offered in 2022 will be available following the live programs.

Quick Start How-to Guides

Develop and publish short "how-to's" for accomplishing common tasks using IETF tools.

Initial guides about IETF Datatracker:

- How to adopt a document?
- How to add Additional Resources to the WG?
- How to add "Additional document resources" for the WG document?

Suggestions about or interest in developing others?

A note about judging WG sentiment
