

2022-10 IAB Workshop
Management Techniques in
Encrypted Networks (M-TEN)

M-TEN Workshop Goals

- From the workshop webpage:
 - *“This workshop aims to discuss ways to improve network management techniques in support of even broader adoption of encryption on the Internet.”*
- Workshop divided into 3 two-hour sessions:
 1. “Where we are” – Requirements and Passive Observations
 2. “Where we want to go” – Collaboration Principles
 3. “How we get there” – Collaboration Use cases

Workshop Results

- Excellent discussion over 3 days
- Roughly 35 participants
- Topics, presentations and discussions included:
 - How to safely measure/manage encrypted traffic
 - Deployments of real-world datacenter solutions
 - Benefits and motivations for collaboration
 - Multiple proposals for end-point collaboration
