

Internet Research Task Force Plenary Report

Colin Perkins
IRTF Chair

IETF 115 / 9 November 2022

Applied Networking Research Prize

**Internet
Society**

The Applied Networking Research Prize recognises:

- the best recent results in applied networking
- interesting new research ideas of potential relevance to the Internet standards community
- and upcoming people that are likely to have an impact on Internet standards and technologies

Three ANRP award talks presented during the IRTF open meeting earlier today:

- **Gautam Akiwate** for his work on the risks of domain hijacking due to registrar practices
- **Corinne Cath** for her ethnographic work on the IETF's distinct organisational culture and how its 'rough' edges limit the ability of human rights' advocates to get their concerns included in technical discussions
- **Daniel Wagner** for his work on DDoS attack detection and mitigation

Papers and slides at <https://irtf.org/anrp/>, recordings on IETF Channel on YouTube

The logo for ANRP 2023 features the letters 'ANRP' in a stylized font where each letter is filled with a complex network of grey nodes and connecting lines, resembling a graph or neural network. To the right of this graphic, the year '2023' is written in a simple, outlined, sans-serif font.

Applied Networking Research Prize

Nomination deadline:
18 November

The IRTF is pleased to offer travel grants to support early career academics and PhD students from under-represented groups to attend the IRTF meetings co-located with the IETF

We also offer travel grants to attend the ACM/IRTF Applied Networking Research Workshop and make a small number of meeting fee waivers available

<https://irtf.org/travelgrants>

Thank you to our sponsors – please contact the IRTF Chair if you wish to help expand these programmes
