

STAMP over MPLS LSP

draft-mirsky-mpls-stamp

Greg Mirsky

IETF-115 November, 2022

Proposed mechanism

- Use IP/UDP encapsulation:
 - Destination IP address:
 - From 127/8 range for IPv4
 - ::1/128 for IPv6
 - Destination UDP port number – 862 is recommended; a number from the Dynamic port numbers range - optional
 - TTL/Hop count – 255
- Use LSP Ping to bootstrap STAMP test session:
