draft-ppsenak-lsr-igp-flex-algo-reverse-affinity

Peter Psenak (ppsenak@cisco.com)

Jakub Horn (jakuhorn@cisco.com)

Amit Dhamija (amit.dhamija@rakuten.com)

Overview

- Presented at LSR interim on 9/21/2022
- Use case has been acknowledged during the original presentation
- Adds three new FAD Sub-TLVs
 - Flexible Algorithm Exclude Reverse Admin Group Sub-TLV
 - Flexible Algorithm Include-Any Reverse Admin Group Sub- TLV
 - Flexible Algorithm Include-All Reverse Admin Group Sub- TLV
- Three new rules are added to the existing calculation rules
 - Similar as what is being done for forward affinities
 - Affinities from a reverse direction of the link are used instead

Next Steps ...

- No additional comments have been received on the WG list
- Comments are always welcome
- Straightforward extension
- Asking the WG adoption
