

MPLS WG Wiki Migration

Tarek Saad

IETF115 - London

Wiki Migration Plans

- The current timeline anticipates turning down trac.ietf.org instances in November 2022
- The current plan anticipates only keeping the content at trac.ietf.org available on the Web for some short amount of time after IETF 115
- This will be then turned off to avoid folks coming across out-of-date content and confusing search engine results
- All content on trac.ietf.org is expected to be archived and available indefinitely, but will take some effort to access (i.e. rather than be a running webservice)

Wiki Migration Action

- Content from trac.ietf.org that we care about SHOULD be copied to wiki.ietf.org ASAP
 - New MPLS wiki is at wiki.ietf.org/group/mpls
- Guide to individuals contributing to wiki:
 - <https://wiki.ietf.org/contributing>
 - The wiki is bi-directionally mirrored with a [GitHub repository](#), which you are welcome to clone
 - Git pull requests are accepted against the repository, though initially direct editing is preferred. Any change made directly on Wiki.js becomes a commit (attributed to your email) on GitHub
- A [wiki.ietf.org Zulip channel](#) exists for questions/discussions on migration
- Support at: support@ietf.org

Ask from the WG

- Volunteers to migrate our existing wikis
- New wikis will be used for further documentation (e.g. meetings, etc.)
