

# RIFT Key-Value Registry

## draft-ietf-rift-kv-registry-04

IETF 115

London

**Jordan Head** (presenting)  
Tony Przygienda

# What's new in this version?

- Document is in Shepherd review and awaiting write-up.
- Feedback yielded some fixes thus far:
  - e.g. references, boilerplate, etc.

# What's next?

- Wait for the Shepherd write-up to be completed.
- IANA early review indicated everything they need is there except for clarification on whether the “Value” column has any upper boundary.
  - Basically, we need to provide all feasible ranges and mark them appropriately (i.e. reserved, unreserved, illegal, etc.)
  - This will be adjusted and submitted ASAP.

Thanks
