Jordan Head (presenting)

What's new in version 16?

- **Added more detail to some sections to better clarify things.**
 - e.g. describing how the thrift model translates to TIEs being serialized on the wire.
 - e.g. additional pointers in the Reader's Digest section.
- **SVGs now properly align with ASCII images.**
 - i.e. they tell the same story.
- **Several SVG optimizations allowed them to work in the HTML version.**
 - Tiny 1.2 compliance helped reduce size and got us around IETF tooling challenges.
 - Still required lots of manual XML manipulation.
- **Updates to the IANA Considerations section.**
 - Updated thrift schema (v6.1).

What's new in version 16?

- **The usual editorial changes.**
 - Grammar, spelling, flow, references, etc.
- **Improved I&D language.**

What's next?

- Continuing to work through AD review process.
- We'll continue to reply as quickly as possible.
- AD to help Chairs / Shepherd facilitate having me added as named co-author.

Thanks
