

Service Provider OOB

IETF **115**

STIR WG

Jon – London – Nov 2022

draft-ietf-stir-servprovider-oob

- A draft about using OOB outside the original threat model
 - Assumes the CPS is not an untrusted third-party service
 - Instead something operated by (or for) the originating or terminating domain, or some sort of authorized gateway
 - i.e., what if the entity operating the CPS would already see the non-SIP call signaling?
 - And hence learn the called/calling party numbers
- Descriptive of emerging efforts in the deployment of STIR
 - Not a science project, aiming for PS

Updates and Next Steps

- Basically, a maintenance update here
 - Just general cleaning, nothing dramatic
- I think if we need to do more here, we should identify what that is - or let's ship it
