

RFC 6951bis: SCTP/UDP

draft-tuexen-tsvwg-rfc6951-bis-02

Michael Tüxen (tuexen@fh-muenster.de)

Randall Stewart (randall@lakerest.net)

Motivation

- Incorporate draft-tuexen-tsvwg-sctp-udp-encaps-cons-06 into RFC 6951.
- This adds explicit considerations about the handling of packets containing an INIT chunk.
- Feedback from the former and current Transport AD indicated it is better to write a bis document for SCTP/UDP than to have two documents covering it.

Status

- draft-tuexen-tsvwg-rfc6951-bis-00
Submit RFC 6951 as an ID.
- draft-tuexen-tsvwg-rfc6951-bis-01
Update to xmlv3.
- draft-tuexen-tsvwg-rfc6951-bis-02
Wordsmithing and updating references
- Implemented in the SCTP stack of FreeBSD and Linux.

Next Steps

- Incorporate draft-tuexen-tsvwg-sctp-udp-encaps-cons-06.
- Incorporate any additional feedback.
- Working group adoption?
