

RASP RG: Research and Analysis of Standard-Setting Processes Proposed Research Group

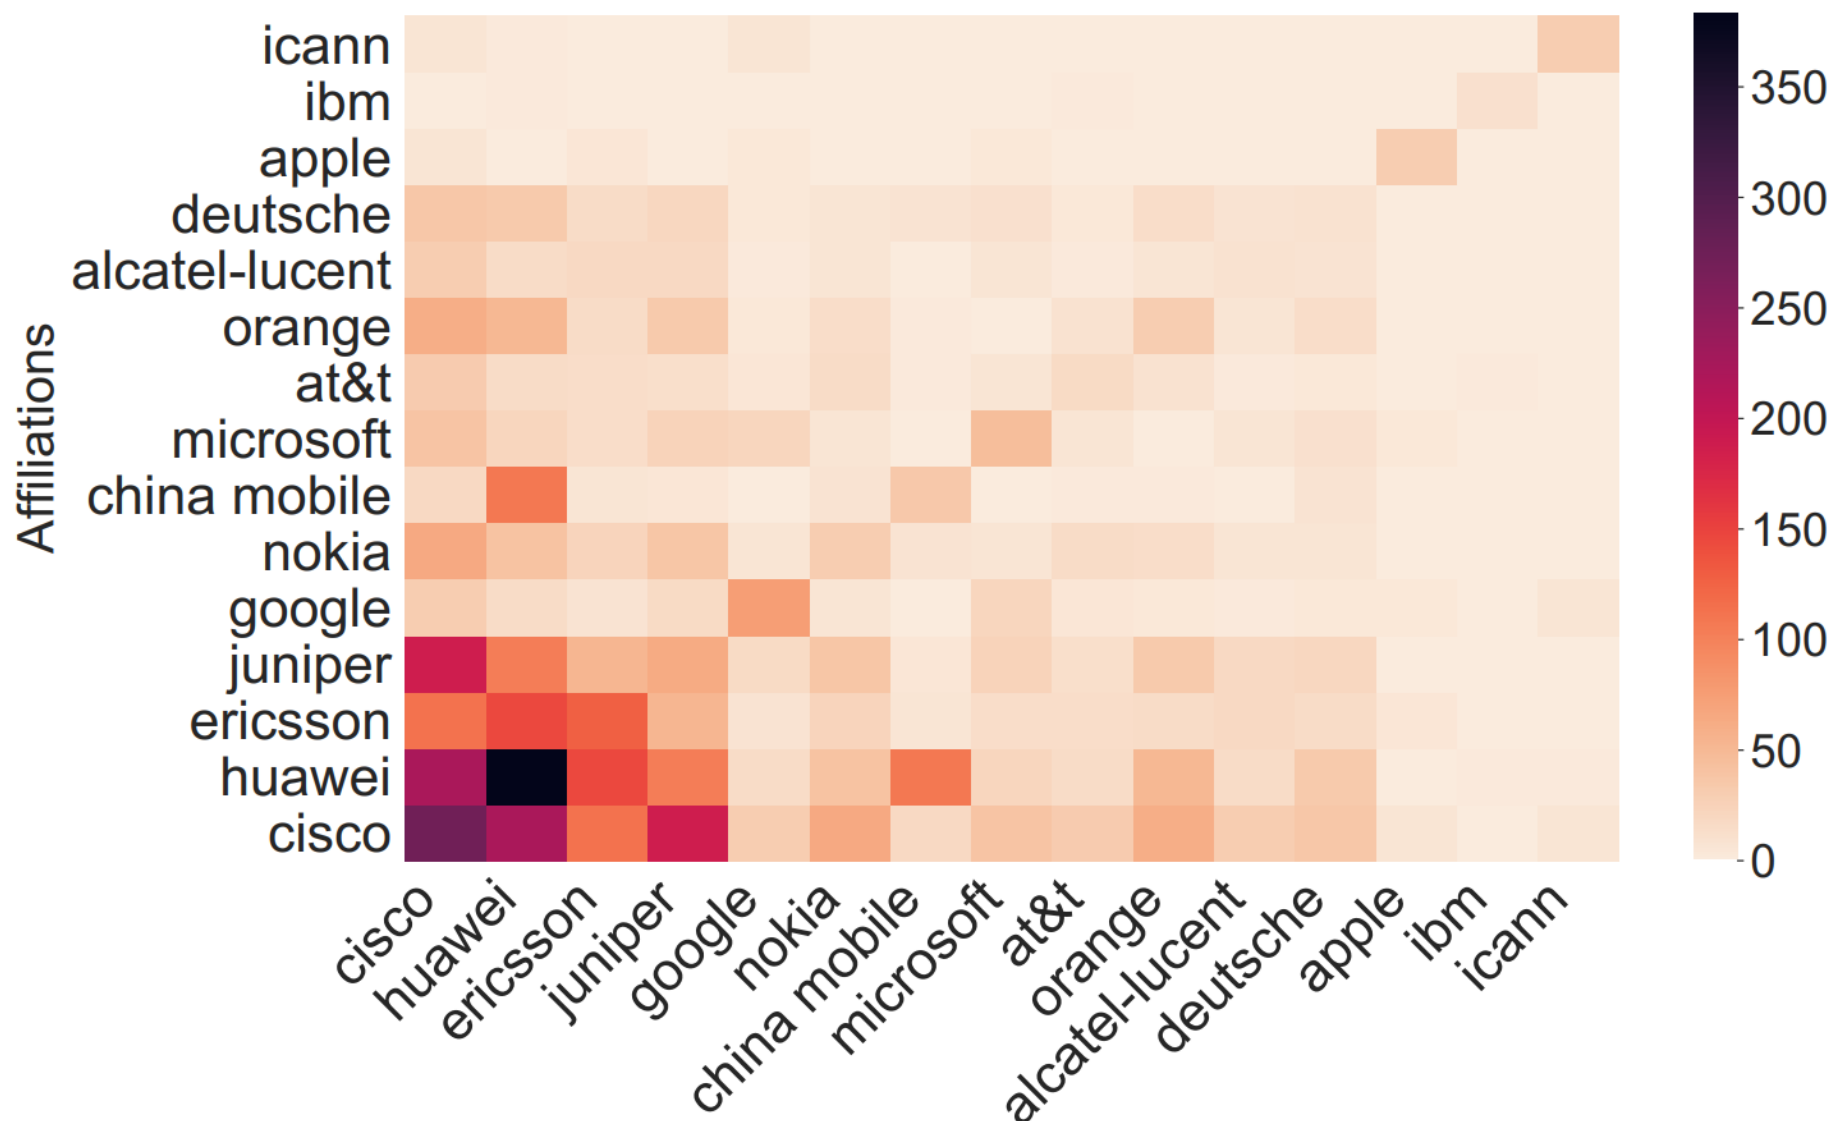

Ignacio Castro & Niels ten Oever

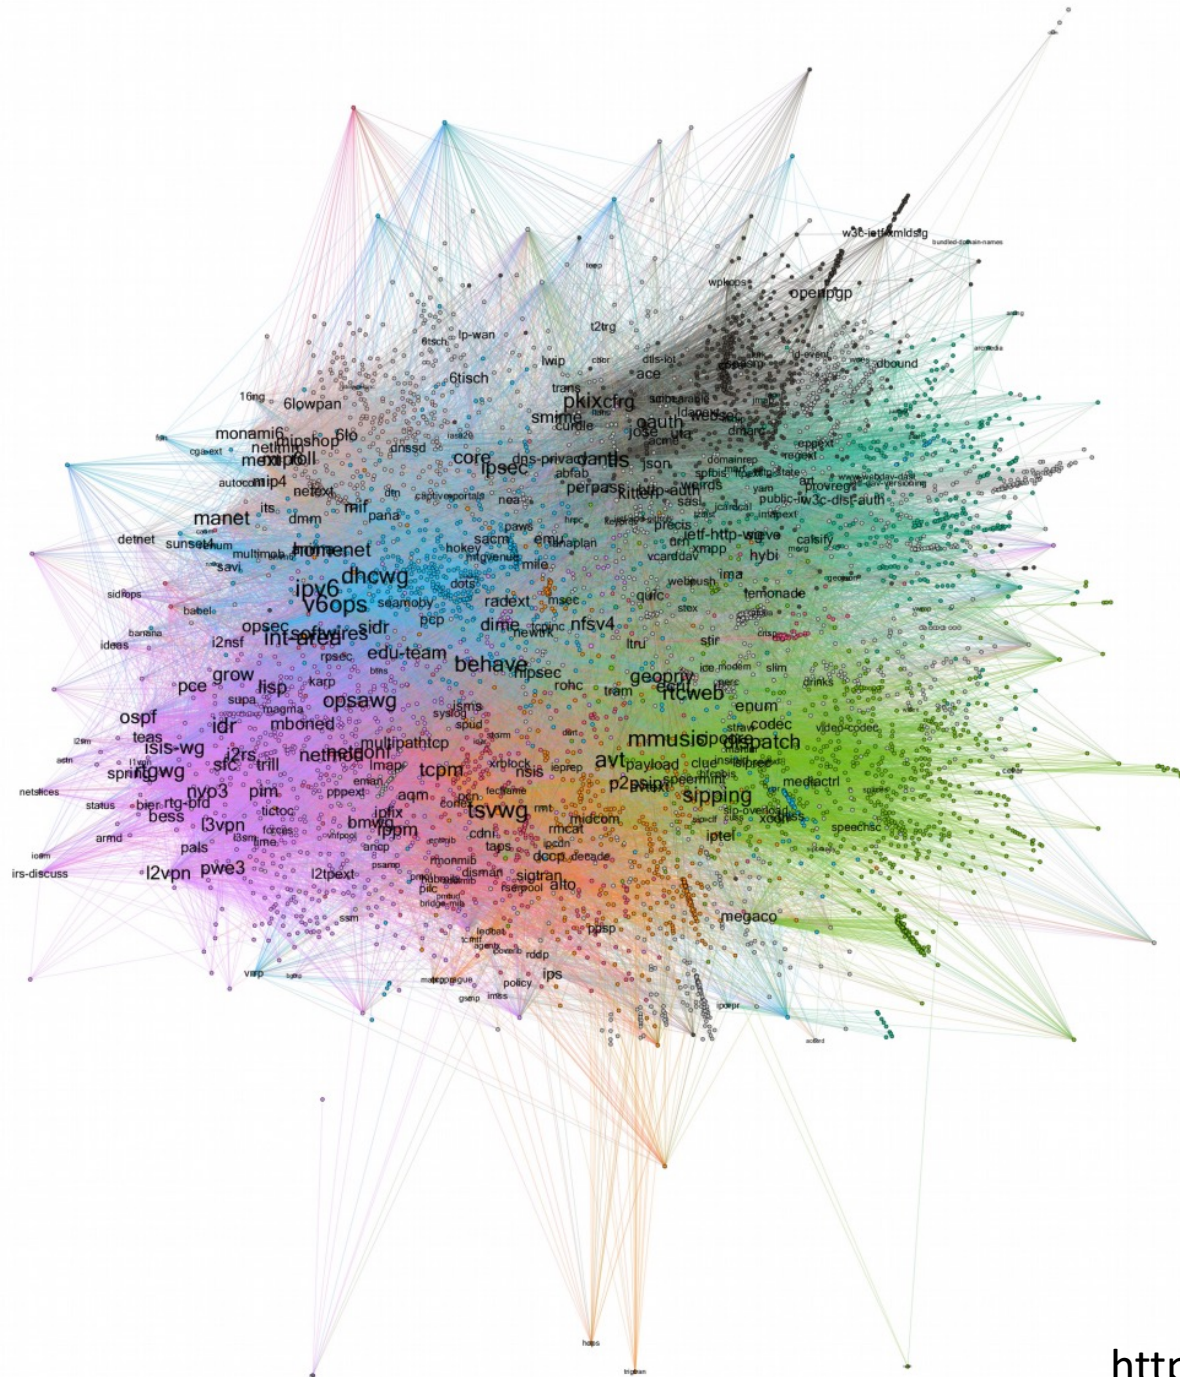

IETF 116

RASP in a nutshell

- Further the understanding of the standardization process
 - At the IETF
 - Across Standard Development Organisations (SDOs)
 - Data not judgement
- Outputs (expected/potential):
 - Joint reports to inform the IETF (and other SDOs) and the research community
 - Open datasets
 - Tools/Open-source software
- Approach:
 - Collaborations: practitioners/developers/policy makers/researchers
 - Organization of working sessions
 - Prevent duplication
 - Produce evidence-based reproducible work
- Charter: <https://datatracker.ietf.org/rg/rasprg/about/>
- Chairs: Niels ten Oever & Ignacio Castro

<https://github.com/dataactive/bigbang>

RASP is NOT aiming to

- Make hierarchical comparisons among SDOs
- Define operational IETF processes

Join the RASP meeting!

- When: 1pm Thursday
- Where: G316
- Agenda:
 - RASP RG chairs - Welcome and Introduction
 - Corinne Cath - The Hard Work of the Hum: using ethnography to study power and politics in the IETF
 - Stephen McQuistin - Data-driven Reviewer Recommendations
 - Sebastian Benthall - The Expanding Universe of BigBang
 - Priyanka Sinha - Some Research and Methodologies from IETF Data
 - Effy' Xue Li - Large Language Models in Standards Discourse Analysis
 - RASP RG going forward discussion
