Sieve Processimip

draft-ietf-extra-sieve-processimip-01

Ken Murchison

Ricardo Signes

Matthew Horsfall

Change Action Name?

- Some automated systems send calendar event attachments that aren't iTIP (no REQUEST property), such as doctor appt, flight reservation, etc.

- Users would like to have these events added to their calendar via Sieve.

- Should we add a new processimip argument to allow this and/or change the action name to something more appropriate (e.g. updatecal)?

Change Action Name?

- Do we leave the complexity of finding an iCalendar attachment and handling the method in the action itself, or leverage RFC 5703?

- foreverypart {
-   if header :mime :contenttype "Content-Type" "text/calendar" {
-    if header :mime :param "method" "Content-Type" "REQUEST" {
-     …
-    }
-    elsif header :mime :param "method" "Content-Type" "REPLY" {

   …

  }

 …

-   break;
- }
