

Next Steps for (Use Cases and) Requirements Draft

Spencer Dawkins and James Gruessing

Next steps on (Use Cases and) Requirements Draft

- Chairs issued adoption poll on draft-guessing-moq-requirements-04
 - They asked for feedback on the MOQ list, by 14 April 2023
 - Please provide feedback, of course!
- draft-nandakumar-moq-scenarios-00 was submitted on 13 March 2023
 - Draft contains Section 2 ("scenarios") and Section 3 ("differences")
 - Overlaps with Section 3 ("**use cases**") in requirements draft
 - Draft contains Section 4 ("handling scalable video codecs")
 - Overlaps with Section 4 ("**requirements**") in requirements draft
- Spencer, Cullen, Suhas, Christian discussed "what to do?" this week
 - Authors from both drafts will work to integrate text
 - **Not just "cut and paste", requires thought**

Beyond "Next Steps"

- Scanning WARP draft repo and draft for generic requirements
 - WARP-specific requirements would stay in WARP
 - Requirements applicable to any MOQ protocol would move
- Continue to focus on additional generic requirements
- Update to reflect architecture in use in the working group
 - "After a minimal architecture becomes accepted
- Update to reflect terminology in use in the working group
 - After the working group converges on accepted terminology
