IETF 117 – ANIMA Working Group

BRSKI-AE status: changes since IETF 116

WGLC ended on April 3rd

just one comment received, by Brian Carpenter:

- Please replace URL for reference [BRSKI-AE-overview]

Shepherd review by Toerless Eckert; two suggestions:

- I would suggest to move RFC7030 to normative references
- Please introduce abbreviation LwCMP (for Lightweight CMP)

Changelog from draft-ae-04 to draft-ae-05: editorial changes only

- Change URL of BRSKI-AE-overview graphics: refer to slide on IETF 116 meeting material
- Add the abbreviation 'LCMPP' for Lightweight CMP Profile to the terminology section
- State more clearly in Section 5.1 (on BRSKI-CMP) that [LCMPP] is mandatory when using CMP
- Remove entries from the terminology section that should be clear from BRSKI
- Tweak use of the terms “IDevID” and “LDevID” and replace “PKI RA”/”PKI CA” by “RA”/”CA”

BRSKI-AE status: waiting for WGLC results

- Done already for IETF 115:
 - IETF PoC implementation ✓
 - WG review done by Michael Richardson ✓
 - Document shepherd review done by Toerless Eckert ✓
- Done already for IETF 116:
 - SECDIR early review ✓
- WGLC and document shepherd writeup ✓
- Basically ready for AD review, however:
 - to be added: discovery of registrar with BRSKI-AE feature set
 - waiting for outcome of [today's discussion](#) on discovery for BRSKI

BRSKI-AE: abstract protocol overview
