Camilo Cardona (camilo@ntt.net)

Diego Lopez (diego.r.lopez@telefonica.com)

Restructuring the LMO Proposal

- Better identify goals
- Decouple LMO concepts and specific models
- Facilitate adoption
 - Concepts
 - Models as they evolve
- Enable collaboration
 - Other WGs: IVY...
 - Research groups: NMRG...
 - Even beyond the IETF

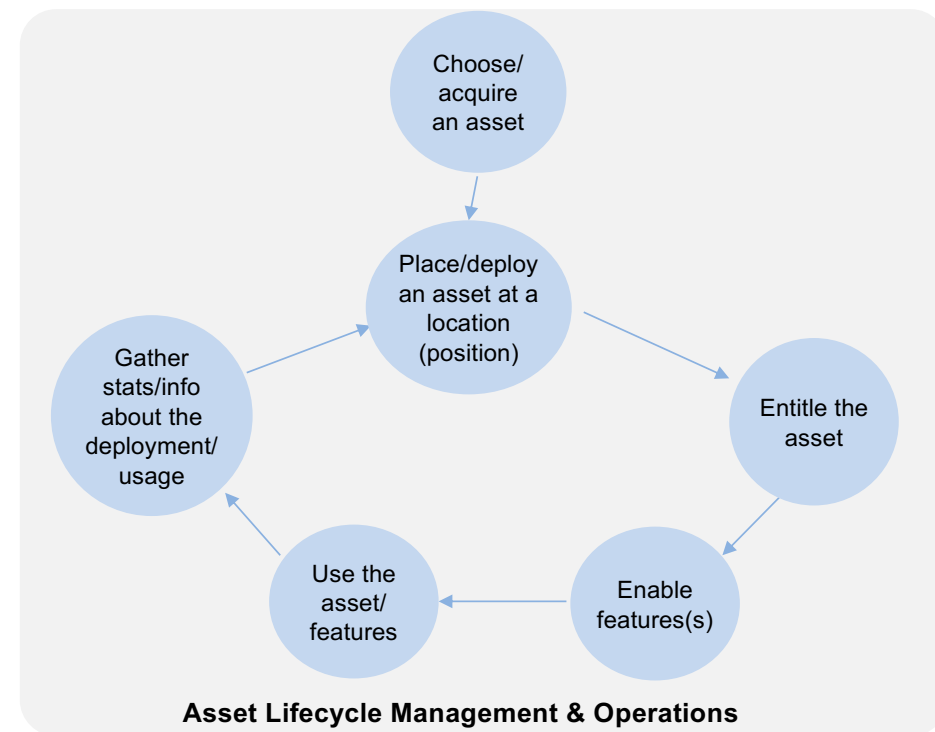

What's New in Latest and Last DMLMO Draft

- Work in progress
- Set the ground for the document restructuring
 - draft-palmero-opsawg-ps-almo-00 explicitly referenced
- Clarify use cases
 - Focus on dynamic issues, from DevOps to supply chain verifications
- Focus on asset management (the ALMO approach)
 - Assets
 - Features
 - Entitlements
 - Usages
 - Event reports

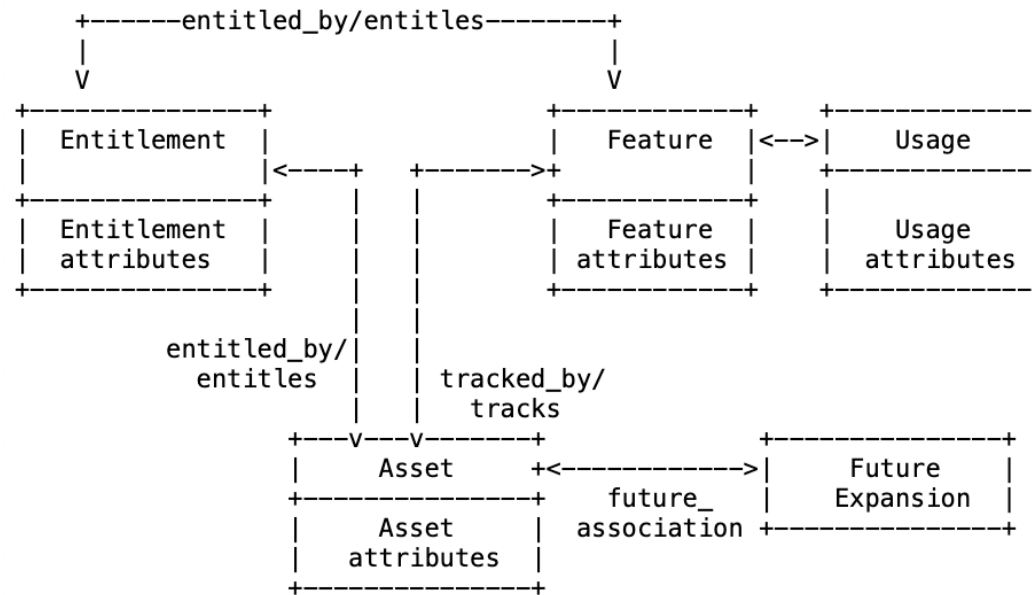

The ALMO Problem Statement

- Describes the framework, motivation and requirements for the lifecycle management of an asset to improve operational practice
 - Initial asset selection and positioning
 - Management of entitlements and feature enablement
 - Usage and reports
 - Asset renewal
- ALMO data measure asset-centric lifecycle metrics including
 - Asset adoption and usability
 - Use entitlements and metrics
 - Supported and enabled features and capabilities
 - Reported events and/or issues
 -

(Not limited to the above...)

ALMO Information Model

Note:

Under **future expansion/association**, it will consider Event Report (replacing Incident Management), Customer and Organization YANG Data Models from DMLMO v10

ALMO and IVY

- Avoid duplication and inconsistencies
 - Inventory: what you have
 - Lifecycle: how you use it
- Common ground on essential concepts and models
 - At least, align terminology
 - Assets
 - Entitlements
 - ...
- Identify synergies
 - The ALMO authors will rely on IVY inventory models
 - And we expect to be active reviewers and contributors to the WG evolution
