

Rate-Limited Token Issuance Protocol

draft-ietf-privacypass-rate-limit-tokens-02

Tommy Pauly, Chris Wood, Steven Valdez,
Scott Hendrickson, Jana Iyengar
Privacy Pass
IETF 117, July 2023, San Francisco

Recent changes

Clarify that if you need different policy time windows, you need different issuer names

Clarify first-party / third-party web usage

Clarify Attester penalizing Client for frequent secret rotation

Add security consideration about rate limit effectiveness being determined by Attester selection

Renamed terminology and headers (see next)

Renaming

We've painted the bikeshed green!

Terminology

Anonymous Origin ID \longrightarrow Client's Origin Alias

Anonymous Issue Origin ID \longrightarrow Issuer's Origin Alias

HTTP header (both directions)

Sec-Token-Origin \longrightarrow Sec-Token-Origin-Alias

Next steps

Two open issues currently

Main one is to align with key consistency story for privacy pass!

At least one more update before WGLC

Interop testing
