

# TIGRESS

IETF 117  
Brad Lassey

# What's happened since 116

Two drafts adopted

- Requirements:
  - <https://datatracker.ietf.org/doc/draft-tigress-requirements/>
- Threat Model:
  - <https://datatracker.ietf.org/doc/draft-lassey-tigress-threat-model/>

Thanks to ekr and dkg for review and feedback

# A Request, nea Plea...

Please read and give feedback on these documents

# For those who have read the documents

- Do we all understand the problem space?
- Any questions?
- Any issues to discuss?

# Next steps

More fully flesh out and explore the proposed design directions

- HTTP application/extensions (a.k.a original proposal)
- WebDAV-based solution
- jmap?

# Smooth transition....

Yogesh would like to advocate for the original proposal over other options
