[PR #39](): Reorganize the draft

Already submitted. Please take a look!

#2: Multipath

IETF 117: Not sure what we can say here.

Gorry tried! See Section 5.7 of the draft.

: Non-standard and Unspecified Algorithms

Algorithms can be:

- Specified
- Described in a paper
- Have an open-source implementation

What are our expectations for testing?

#7 AQM and #11 Desynchronizing Flows

- Evaluating CCs with different AQMs
  FQ-CoDel, PIE, L4S have RFCs. Others?
- Is evaluating AQMs out of scope? (RFC7567)
